

Remote Learning Offer

St Anne's uses the Google Classroom application in order to provide remote learning to our pupils when this is needed. In these events, learning is uploaded onto the electronic platform for the day, the children complete and then upload their work for their teacher to check, mark and provide feedback. We will also aim to do some live lessons, which you will know the schedules for. In addition to this, some pupils who have more difficulty learning on a device, will be provided with physical learning packs on a weekly basis by the school's SENCO, Ms Debra Da Silva.
